

In 2010, Jungle Jim's switched wheel suppliers; bearings and retainers are **NOT** interchangeable. Please read below and look at the break down above to determine your model. Please make sure that **ALL** items apply before ordering.

Carlisle (907 & 909): The caps on the studs that hold the hub together is round with a "T" & a globe stamped on it, outer edge of retainer (909) is round, and the bearings (907) have 6 pins that do not spin.

Marathon (907-2 & 909-2): The caps on the studs are either hex head with "LB" & "48" stamped on it or plain round, outer edge of retainer (909-2) has a flat side (like a flat tire), and the bearings (907-2) have 4 pins that do not spin.
